10-Driver - Download - Page 4.

19-Dec-2015 Activinspire Driver 10 on
Windows XP. You can use Driver Alert and
Update. you're going to need an Internet
connection. Vista/7/8. The Driver for other
operating systems,. "ActivInspire-Digitalizer
10" is compatible with all Windows 7/8/10
operating systems. 30-Aug-2015 I have both
the 32 and 64bit versions of Windows 8.
20-Aug-2015 I have both the 32 and 64bit
versions of Windows 7. 09-Jul-2015 I have
both the 32 and 64bit versions of Windows

XP. 07-Aug-2015 I have both the 32 and 64bit versions of Windows Vista.

14-Feb-2015 I have a Windows 7 computer. I have the.2 drivers on my computer. The drivers are for Windows 7 64 Bit.

28-Feb-2014 I have the driver for Windows 7 64 bit. I found it here: 04-Feb-2014 I have the 32 bit drivers. I found them here:

15-Jul-2013 I have the 32bit drivers. I found them here: 16-Jul-2013 I have the 64 bit drivers. I found them here: 15-Feb-2013 I uninstalled Inspire and my next thing to do is to get the drivers for Windows 7. I went here: The 32 bit drivers were there.

15-Feb-2013 I uninstalled Inspire and my next thing to do is to get the drivers for Windows 7. I went here: The 32 bit drivers were there. 10-Aug-2012 I uninstalled Inspire and my next thing to do is to get the

drivers for Windows 7. I went here: The 32 bit drivers were there. 10-Aug-2012 I uninstalled Inspire and my next

activinspire 2.4 by activinspire. 02-Sep, ActivInspire 2.4, my first activation in 10 years, no drivers needed for my Promethean Activboard 5001, drivers, software or configuration issues.. Actiflow with demo license. download. 3. Download the latest Active Drivers for your Promethean V3 Control System. All Prom. 3. Download the latest Active Drivers for your Promethean V3 Control System. All Drivers.

20-Dec-2018 If your promethean is not supported, this might be the solution for you. . Please read the tutorial. 07-Feb-2017 I got an activboard 5001 and an activpanel 11. The activpanel 11 has the similar

problem with the activboard, but I don't know the software that the driver is for.

02-Nov-2017 We've now got it running properly, it's working fine. We did have to do some tweaking, but that was all fine. A lot of the big problems that we had with the old software were solved by just installing the latest Active Drivers on our old drivers.

03-Nov-2015 I also had ActivInspire that was listed at "install from a software distribution" that I couldn't open. It showed the ActivInspire logo then went back to the DOS install page. I had to use the uninstall driver to remove that program and reinstall the older version. 07-May-2017 Thank you

for your input. I have sent a message to Pannasonic. 23-Dec-2016 I'm having a very frustrating time with the latest drivers. First of all, you need to download the

ActivInspire. We currently have a 64bit version. When you go to the website, the drivers are listed as both 32bit and 64bit. You then go to the "Dri" tab and click on the driver of your choice. It then downloads the correct driver. You click on "Install" and the installer runs. I downloaded the 64bit drivers and the installer automatically downloaded the 32bit drivers for me. This is both frustrating and incorrect. If you click on "easy setup" you have to load the setup.bin file. This is the difficult part. When you load the setup.bin file, you go to the right place but the menu items and names are different. It's not intuitive
