Z1 Dashboard Software Crack Works

A: That could be a problem with the screen resolution your monitor is using. If you are viewing the dashboard on a monitor with a resolution of 1440x900, then it may not be displaying properly. The resolution is in pixels. To resolve this issue, we recommend that you resize your monitor, using an operating system such as Windows or macOS, to a resolution of 1920x1080 or above. Q: PHP echo not showing php variable in javascript I'm trying to send a php variable to javascript in a different page using AJAX. I'm able to send data to my function in the PHP file and the data is being shown as intended on the php page with a line of text but when it's sent to the javascript it's not showing anything. I'm new to AJAX, could it be something to do with my location in the html and the fact that the function is in the same file? PHP: $getuser= $_GET['user']; echo $getuser; HTML: Click Here function getData(str) { if (window.XMLHttpRequest) { xmlhttp=new XMLHttpRequest(); } else { xmlhttp=new ActiveXObject("Microsoft.XMLHTTP"); } xmlhttp.onreadystatechange=function() { if (xmlhttp.readyState==4 && xmlhttp.status==200) { document.getElementById("out").innerHTML=xmlhttp.responseText; } } xmlhttp.open("GET","getData.php?user="+str,true); xmlhttp.send(); } A: Change your a tag like this

[Download]
