Need to create an online real estate business website or business brochure for your new retail store? Ideal for beginners and business professionals alike, JumpBox is a rapid-development framework for Joomla! 2.5 that creates an entire website (or business brochure!) in one or two steps. It's free, it's easy to learn and it's proven. Installing... Developers Create a new contact form using the easy-to-use Contact Form 7 plugin Popular CMS and Websites Basic Installation Follow these steps to install and activate Contact Form 7: Unzip and upload the latest version of the Contact Form 7 files to the /templates/ directory of your Joomla! installation. [Note: This file is not actually used in the process of installing the plugin.] - OR - If you are using Joomla! 3.2+, 2.5 or 3.1, follow these steps to install and activate the plugin: In the text-editor of your choice, create a text file named contact.php in the root directory of your Joomla! installation. Paste the following code into your contact.php file: If you plan to use Joomla! CMS 3.2+, 2.5 or 3.1, you'll need to upload this file and place it in the extensions directory. Notice: Depending on how it is installed, this file might not be required. Be sure to only activate the plugin if needed. Download Download the complete zip file from the Contact Form 7 downloads page. Unzip the file and upload to the /templates/ directory of your Joomla! installation. Hot-Update Just upload the file to your site, and it will be activated. If the plugin was installed correctly, you should see a "Hot-updated!" message on the front-end of your site.

What's New In?
