AES Free is a useful application which combines the latest encryption technology and allows users to browse for their files and compress folders, create container files and shred folders. Self-extracting files are executable programs (EXEs) that contain a AES-file and the software necessary to decompress the contents. Users can decompress the contents of a self-extracting AES-files simply by running it like any other program. No other software is needed. These self-decrypting AES-files are ideal to electronically distribute the information safely because they contain multiple compressed and encrypted files and folders. This feature is especially convenient for sending encrypted files to people who do not have PGP installed. AES Free use AES algorithm and 128 bit keysize. The length of the password may be up to 7 symbols. Your feedback is very important for us. For any problems, questions or suggestions, please email us.
