Open the program and load the file. If the tool has problems to open it, it may be a matter of antivirus. If this happens, delete the file as the copy in this article You will now have the ability to edit the mesh. A: My trick is to take a standard mesh template and load it into your open model. I'll then cut out the pieces that I don't want to change and change them. (source: andrewmarklo.com) A: It is not possible. The AC100 is a commercial product with a different scripting language, and it is also a full feature CAD system. If you want a more seamless interface, it's probably best to save the template file and load it in another CAD system. Plans to build 16,000 homes on a large area of open countryside in Peterborough are being attacked by residents who fear the new village will ruin the character of the area. The open land is owned by the Environment Agency and there has been no planning permission for the site, which covers 9.2 hectares and includes fields, woodlands, hedgerows and the A16. The design proposal for the development, which is called Datchworth, includes a village centre, a school, shops, public houses and sports facilities. The plan was put forward by a Peterborough City Council development team that will be under the chairmanship of Councillor Ollie Twyford. Mr Twyford said: "We have a unique opportunity to develop a large area of countryside with a substantial number of homes. "It has been thought of in the past as a 'stubborn' area, but this is a city that is doing what it can to keep up with the wider demands of the area. We will only go forward with the development if it will make the site more attractive and let us keep up with the rest of the city. "We do not intend to alter the open countryside, but we do want to create something new and to accommodate what the land can do. "We have had a very positive response from the community and from the council and we have begun the consultation process. We now need people's views on what sort of development is suitable for the site." Councillor Rob Boddy, executive member for planning, environment and strategic regeneration,
