“In the first year of the FIFA license, we wanted to deliver a game that was true to the footballing spirit of the sport and this is exactly what we have achieved with FIFA 22,” said Alex Jeffrey, Senior Product Marketing Manager, EA SPORTS. “The game captures some of the most high-octane, high-energy football matches that football fans can look forward to watching in the upcoming season.” HyperMotion Technology also allows for more natural ball movement, easier passing and shooting as players can get into the flow of the action more easily. The ability to interact with the ball has also been improved through the addition of a new ‘follow’ ability on the ball to add another dimension of creativity. Multi-team and single-player modes will be available to play, with FIFA Ultimate Team and Seasons modes also being enhanced. A brand new story-driven narrative mode will be available where you can take on single or multi-player challenges and compete for top rankings. A brand-new first-person camera has been included in the game for a more immersive experience. A sandbox mode is also available for all new players to experiment in the world of FIFA. FIFA 22 will be available for PlayStation 4 on the UK, Australian and New Zealand PlayStation Store on Tuesday 16th November. The Worldwide Beta will be available to download and play on PlayStation 4 from early November. Fans will be able to compete in the Beta alongside other EA SPORTS beta testers, and gain an early look at the HyperMotion Technology that FIFA 22 harnesses before the game is released to the public in November. Key Features “HyperMotion Technology” allows for more natural ball movement, easier passing and shooting as players can get into the flow of the action more easily. Powered by the most realistic data from elite player performances, FIFA 22 delivers a more authentic football experience. All-new Story-Driven Narrative Mode allows players to take on single or multi-player challenges and compete for top rankings. All-new Sandbox Mode allows players to explore the many new aspects of the game. FIFA 22 introduces “HyperMotion Technology,” which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. FIFA Online is a free-to-play massively multiplayer online football game. With no need for annual purchases, it allows you to play with your friends anytime and anywhere, on PC, Xbox or PlayStation platforms. What is the History of FIFA? From the beginning, FIFA World Cups have brought fans together from across the globe. From Germany in 1954 to Mexico in 1986, fans from around the world had only one thing in common; they were all hungry to watch their team in action and follow its evolution through the years. The first FIFA World Cup was held in 1930 between Argentina and Uruguay. It was the first tournament to be broadcast live to the public. FIFA World Cups would grow to become the most watched sporting event in the world with over 2 billion fans watching in some of the biggest countries in the world, showing just how much the game means to people around the world. The FIFA World Cup is back, and it's bigger and better than ever. The FIFA World Cup Brazil 2014 has just been named World Game of the Year at The Game Awards 2018. Winning the title means we've been shortlisted as a winner in the Inspire Award, our first ever. What is the new Fifa 22 Serial Key? FIFA 22 also includes everything new, including enhanced online features, an upgraded soundtrack, and new camera angles. This is a game that we're proud to call our most ambitious project yet. We want to take football fans on the adventure of a lifetime. What are the new features? The FIFA Star Ratings, which give players an overview of a player's attributes and strengths on the pitch, are also a new and unique feature in FIFA 22. Players now have to think about their positioning, how hard the player is to beat, and how dominant he is in his position.
